*YEAR-END DAY, December 31 or Y, an extra Saturday (a WORLD HOLIDAY), follows December 30th every year.
**LEAP-YEAR DAY, June 31 or L, another extra Saturday (a WORLD HOLIDAY), follows June 30th in leap years.

COLUMBIA UNIVERSITY FELLOWSHIP ESTABLISHED

Steps were taken recently to develop a syllabus for the study of time measurement and calendar revision, for use in secondary schools and junior colleges, when a contract was signed by Teachers College of Columbia University and The World Calendar Association to establish a one-year fellowship in the subject. The fellowship is under the direction of Dr. Samuel R. Powers, head of the Teachers College Bureau of Educational Research in Science, and will result in a monograph for teachers, to be published in the "Science of Modern Living" series of the Bureau.

The subject was chosen, Dr. Powers declared, because of the accumulating interest in calendar revision, and because it seems well adapted to foster an open-minded and objective attitude in the pupil. The monograph will provide a wealth of study suggestions in measurement of time, calendar history, the influence of the calendar upon modern life, and the need for a new calendar to make it more balanced, stable and regular.

Miss Elisabeth Achelis, president of The World Calendar Association, signed the contract on behalf of the association. (See picture on other side.) "It is our aim to secure adoption of The World Calendar of twelve months and equal quarters by 1945," she said, "but the prospect is that this fellowship will provide teachers with excellent study material for many years to come, because there is no phase of man's activities that is more inclusive, or more ancient, than his measurement of days, weeks, months, seasons and years. As his scientific and general knowledge has improved, he has improved his calendar. Today he stands on the threshold of further improvements, to be derived from further study of time and the calendar. It is fitting, therefore, that youth should be educated to understand the background and true uses of the calendar and to realize the importance of having a well-planned calendar NOW. For good planning is essential at all times—in war time as in more peaceful days. Another benefit would result from this study, since time and calendar surmount all issues of politics, creed and nationalism. It would be a uniting link bringing nations and peoples closer together in this common and improved measurement of time."

Dr. Clyde R. Miller, of Teachers College, and Charles C. Sutter, director of The World Calendar Association, participated in the negotiations.

Seated—Miss Elisabeth Achelis and Professor Samuel R. Powers
